

Conference Announcement: 5th Pharmaceutical Chemistry Conference scheduled at Prague, Czech Republic during April 27-28, 2020

Radhey S Srivastava

Distinguished Professor of Chemistry, University of Louisiana Lafayette, La 70504, USA, E-mail: radhey.srivastava@louisiana.edu

We are glad to announce annual meeting "[5th Pharmaceutical Chemistry Conference](#)" hosted by the Conference Series LLC Ltd. was held during **April 27-28, 2020** in **Prague, Czech Republic**, with the theme: "Pre-eminent research work and shaping trends, in pharmaceutical chemistry". Pharmaceutical Chemistry Conference is considered as one of the major conferences provides best platform for attendees to acknowledge, learn recent trends, and advancements in field of Pharmaceutical Chemistry. Pharmaceutical Chemistry conferences showcase the discussion topics confronting the functioning of advanced organic synthetic techniques, analytical method development, screening of drug candidates & lead molecules, metabolic stability studies, and molecular modelling based drug design system.

Euro Pharma Chemistry Conference was focused on such tracks like computational aided drug delivery system, biopharmaceutics & biologics, nanomedicine & nano technology, analytical chemistry, and pharmaceutical chemistry research work. So we invite researchers, specialists, professionals, experts & research fellows, professors, association & societies, and every one share their knowledge by giving the oral, poster and e-poster presentations in this unique platform. Where you will be sure to have a meaningful experience with scholars from around the world; all members of the Euro Pharma Chemistry 2020 organizing committee look forward to meeting you in Prague, Czech Republic.

Global Market: Pharmaceuticals are one of the world's most [profitable](#) industries. During the last 30 years, the industry has spent billions of dollars on research and [reaped](#) billions in return. In recent research projects that global growth rate for the pharma industry of 6.3% [CAGR](#) through 2022, up from the 5% CAGR it predicted last year for the 2014-2020 period, which is evaluated. During the 2008-2015 periods, the growth rate compound annual of global R&D spending was 1.7%; during the 2016-2022

periods, the rate will grow at 2.8%. The year-over-year [increase](#), however, will remain around 3%, *versus* some dramatic jumps seen in 2013, 2014, and 2015. Overall spending will reach **\$182 billion** in **2022**. Research firm says that worldwide drug sales increases year by year.

The [Pharmaceutical Market in EU](#) has a value of over €183 million, positioning Europe as the [second](#) biggest pharmaceutical market in the world, with Germany, France, Italy, United Kingdom and Spain as top five countries. The largest market is Germany with around €48 million which accounts for 24% of the market. Europe accounts for 22% of world pharmaceutical sales and during the period 2012-2017 and 18% of sales of new drugs were on the European market. The total volume of medicinal products consumed globally is set to grow about 3% annually through 2021 and estimations point to a compound annual growth rate of 4% by 2022. European pharma market maintains and forecasts an extensive growth pattern and Europe is becoming increasingly attractive to investors. Probably, for companies of [pharma-merging markets](#) is the best time to explore opportunities and business in the European market.
